* Installed by the New York City Department of Environmental Protection

NO DISCHARGE AREA (NDA)

The New York waters of the Hudson River are an EPA designated **No Discharge Area**, where it is illegal to discharge any boat sewage from a holding tank or portable toilet or use a direct discharge toilet anywhere in the river, from the Battery to Troy Dam. All sewage must be emptied at a pumpout station.

If the waterbody is not designated **NDA**, boaters can discharge treated sewage from a Type I or Type II USCG certified Marine Sanitation Device. The practice is discouraged in all waters of the NY-NJ Harbor Estuary, near shore waters, near shellfish beds, and areas of high boat concentration.

This project is created by Going Coastal Inc, a nonprofit dedicated to improving water quality, promoting coastal access and preserving maritime heritage. Support is provided from a Clean Vessel Act grant from the NYS Environmental Facilities Corp. and additional funds from the NYC Dept. of Environmental Protection, NY-NJ Harbor Estuary Program, New England Interstate Water Pollution Control Commission, and the New Jersey CVA Steering Committee. Visit www.goingcoastal.org for updates and more resources.
